Surabaya, Indonesia

SUMMARY

Highly motivated Informatics graduate specializing in Full-Stack Web and Mobile Development. Experienced in architecting robust and user-friendly digital solutions. As a fast learner who is deeply passionate about the tech industry, I am always open to mastering new frameworks and adapting to evolving project needs. A collaborative team player eager to continuously grow, take on new challenges, and deliver impactful results.

EDUCATION

Petra Christian University (2022 - 2026)

Informatics, Faculty of Industrial Technology | GPA: 3.54

SMAK Kolese Santo Yusup Malang (2019 - 2022)

Sciences | Grade: 89,49

EXPERIENCE

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

Android Learning Path (September 2024 – December 2024)

- Bangkit Academy is a collaborative program with Google, Gojek, Tokopedia and Traveloka designed to prepare students with skills required by the technology industry.
- Manage to learn about android development using Android Studio and Kotlin.
- Learned soft skills needed for the working industries through ILT sessions.

Table Tennis Student Activity Unit 2023 / 2024 Petra Christian University – Surabaya, Indonesia

Vice Chairman (July 2023 – Mei 2024)

- With the chairman, coordinated and briefed our team member for the weekly activity.
- Worked in a team with 15 members to prepare the equipment and logistics for the weekly activity.
- Responsible for helping our coach teach our student activity unit members to become better players.

PROJECTS

1. Multi-Branch POS & Mobile Ordering Ecosystem | Depot Bakso Asli Balikpapan

Developed an integrated multi-branch POS system and a mobile online ordering application into a single ecosystem as my final year project to digitize traditional restaurant operations. Built a scalable backend using Node.js/Express.js and utilized Supabase for PostgreSQL database, Cloud Storage, and Real-Time (WebSocket) synchronization. Developed a Next.js web dashboard for internal management and a React Native (Expo) mobile app for customer self-ordering, utilizing Tailwind CSS and NativeWind for responsive UI styling. Successfully integrated Midtrans for automated payment processing and deployed the entire system via Hostinger, significantly improving the restaurant's operational time efficiency.

2. Gereja Katolik Gembala Yang Baik Surabaya | parokigyb.or.id

Gembala Yang Baik is a Catholic Church located in Surabaya. With my friends, we developed an information system website for the church. The website includes features for both public users and administrators to manage content efficiently. My contribution focused on developing the admin features and designing the user interface for the website visitors.

3. Nourish | [Stunting-app](#)

Capstone project for Bangkit Academy 2024 Batch 2. Developed an Android mobile application with my Bangkit team. The app has features to detect early stunting signs for children and it will give food recommendations based on the children stunting prediction

4. Mocktify | [Mocktify](#)

Mocktify is a Spotify-inspired web app that my friends and I developed using Next.js for our final assignment. We integrated the Spotify API and used Supabase as our backend. My role in the project focused on implementing the Spotify API integration.

5. Easy Kos | [Easy Kos](#)

Website project build using Laravel with Tailwind CSS and DaisyUI for my final assignment. Contributed in integrating Midtrans for payment gateway, created the admin features for CRUD managing users accounts, review feature for visitors, owner feature to accept visitor's orders.

6. NikoHoc | nikohoc.com

My own personal portfolio website.

SKILLS & INTEREST

Technical Skills:

- HTML, CSS, JavaScript, MySQL, PostgreSQL, PHP, Laravel, Kotlin, Typescript, React.js, Next.js, Node.js, Express.js, Supabase, Tailwind CSS, React Native, Expo Go, Native Wind

Soft Skills:

- Responsible, Ability to adapt, Team collaboration, Leadership, Attention to detail, Clear & Strong communication, Problem Solving, Project Management

Interest:

- Software Engineering, Full-Stack Development, Mobile Development.
